

THE NEW SECURITY FOUNDATION; START WITH ZERO TRUST

Your Presenters

- Andrew Cameron – IT Fellow, Identity and Access Management, GM
- Pete Lindstrom – Principal Consulting Analyst, TechVision Research
- Sorell Slaymaker – Principal Consulting Analyst, TechVision Research

TECHVISION

Implementing Zero Trust Networking

- Key Components
 - Going from blacklists of denying to a whitelists of allowed
 - Driving IAM into network sessions
 - Creating a baseline and ferreting out anomalies
- Lessons Learned
 - Firewalls are the new routers
 - Its all proprietary
 - Not slowing down the business in deploying new applications
- What's Next
 - Open Source – Standards are out, so will this create de-facto standards
 - Automation – Tools are still clunky
